VIDEO > INSTALL

H O W T O S H O W A V I D E O

Best is to use h.264 video format as MPEG-4 (.mp4)
(.flv/Flashvideo or mov/Quicktime in h.264 are also supported)

- A. Upload the video in the mediapool as you do for images
- B. Upload an image with the same name and just a different ending/suffix (.jpg or .png)

I N F O S F O R U P L O A D I N G F I L E S

Follow the instructions below to upload files, if...

... you need to upload a lot of images at one time

... the upload of a videofile is aborted because it is too big

1. Upload one or more files via ftp (ftp-client, webftp) to »includes/images« folder
2. Open the mediapool (popup) once again or reload it
3. All pictures should now be available on picture-dropdowns
(leave and re-open template if not immediately available)
